# ***IT'S NEVER TOO EARLY TO START HAVING IMPORTANT PREVENTION CONVERSATIONS***

**Research shows that parents are the #1 reason young people decide not to drink.**

Small talks about underage drinking can make a big difference in a kid's choices. That's because kids really do listen. Research shows having frequent, casual conversations about alcohol, starting around age 8, can be a lot more effective—and a lot less intimidating—than one super serious discussion.

So, start talking. Keep listening. Help give a kid the confidence to grow up alcohol-free.
